

# Hormones and Human Childcare:

Evolutionary and Proximate Dimensions of a  
Cooperative Breeder

**Peter B. Gray**

Department of Anthropology  
University of Nevada, Las Vegas

*Unlike most mammals,  
humans breed in cooperative  
groups, obtaining care from  
fathers, grandmothers, older  
sisters, and others, in  
addition to mothers.*

*What hormonal mechanisms are  
associated with human care  
of young children?*

**4:00 PM**

**Lecture Hall 2**

**Friday, November 20**

**Evolutionary Studies Seminar Series**
